

Roofing Sheets and Tiles

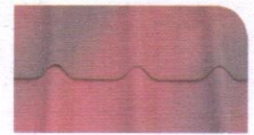

The most flexible, reliable, versatile and cost effective roofing material

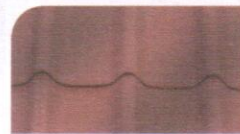

Onduline sheets are extremely tough, lightweight, corrugated roofing and wall cladding material manufactured from bitumen saturated organic fibres under extreme heat and pressure. Today our roofing systems are used widely across the world from the tropics to the arctic for residential, commercial, light industrial and agricultural applications.

Onduvilla corrugated tiles are designed to give roofs a pleasant look reminiscent of traditional clay tiles, while at the same time being extremely light. An exclusive 3 tone painting system ensures a natural texture on the tiles. These tiles are made of a single layer of organic fibres and bitumen combined with resin.

a Large choice of Colours and Shades (Tiles)

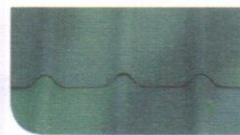

Shaded Red

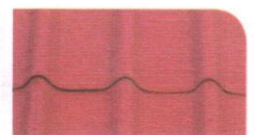

Shaded Brown

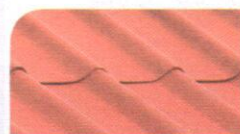

Black

Shaded Green

Classic Green

Product Range

Onduline sheets are available in standard sizes of 2m x 0.95m. The technical parameters of the sheet are shown below

Length	2000 mm
Width	950 mm
Area per sheet	1.9 m ²
Thickness	3 mm
Width of corrugation	95 mm
Height of corrugation	38 mm
# of corrugations per sheet	10
Weight	6.4 kg (3.3 kg per m ²)
Colour	Red, Green, Brown & Black

Onduvilla Tiles

- Width 106 cms
- Length 40 cms
- Thickness 3 mm
- Wave height 40 mm
- Weight per tile 1.27 kgs

Exclusive advantages for your roof

Excellent waterproofing characteristics

Requires minimum maintenance

Easy to cut, shape & install

Resistant to corrosion-does not rust, rot or become brittle

Light weight – 6.4 kg / sheet of area 1.9 m²

Can withstand wind speeds upto to 192 km/hr

Does not break during transportation and installation

Available in a range of environmentally sensitive colours

Excellent colour retention

Applications

Residence

School
